

Postgraduate Information Technology

'My supervisor was incredibly friendly and patient throughout my studies, especially during the completion of my final paper, helping me overcome any obstacles and motivating me to find innovative solutions. I am truly grateful for their dedication and hard work, as it has greatly benefited me and my future.'

Helena

 Master of IT

In 2020, Helena and her family made the move to Wellington from Changchun City, China. In 2023, Helena celebrated completing a Master of Information Technology after a year and a half of full-time study.

Helena's final paper, "A Systematic Literature Review on the Selenium-based Test Automation Framework (TAF) for Web Applications", was so highly applauded by her tutors that it was used as an example for other students.

Helena loved the friendly culture at Whitireia and is grateful for her supportive tutors. The COVID-19 lockdowns were a challenge, but Helena's tutors were able to be flexible. "Despite the challenges posed by the pandemic, we had regular online meetings."

"My supervisor was incredibly friendly and patient throughout my studies, especially during the completion of my final paper, helping me overcome any obstacles and motivating me to find innovative solutions.

I am truly grateful for their dedication and hard work, as it has greatly benefited me and my future."

When Helena first moved, she completed the New Zealand Certificate in English Language (Academic), which she says helped her immensely prior to starting the Master's programme.

In Changhun City, Helena worked at a local university. She heard about Whitireia and WelTec through an agent in China, but it was only after she checked it out online that she decided it was the place for her. Seeing Wellington described as New Zealand's "cool little capital" helped cement the decision for her and her family.

With two kids enjoying school and her husband working as a builder, Helena's family plans to stay in New Zealand. They enjoy the milder climate here compared to Changhun City, which can get down to temperatures of -25 celsius.

Helena's dream is to be a software developer. She is excited to take the next step in her journey, in New Zealand's technology sector.

Master of Information Technology

 Level 9
 18 months, full-time (part-time options available)
 24 Feb 2025 (Petone)
 \$9,602* (indicative for 2025 intake)
 NZ \$40,300* (indicative for 2025 intake)

Elevate your expertise and expand your knowledge base with hands-on research tailored to your passion. Dive into a wide range of cutting-edge topics, including data mining, cloud computing, business analysis, business intelligence, ICT infrastructure, information management, mobile application development, network design and management, security and forensics, quality assurance, and systems architecture. Choose the path that excites you and become a leader in your field.

More detail about this qualification

The Master of Information Technology (MIT) is a level 9 programme that requires successful completion of a minimum of 180 credits from level 8 and 9.

There are two pathways for completing a Master of Information Technology. Both pathways require the completion of a significant research project.

The following structure is proposed for the two available pathways.

All courses 15 credits unless stated otherwise.

Pathways

First Pathway - 90-Credit Thesis

This pathway provides in-depth knowledge of a topic in Information Technology and is suitable grounding work for higher studies at PhD level in New Zealand or overseas. The research produced can lead to scientific publication. This pathway enables the student to undertake significant independent research.

[IT8501 - Research in Information Technology - Online/Blended delivery](#)

[IT8502 - Research Proposal - Online/Blended delivery](#)

[IT9502 - Thesis \(90 credits\) - Online/Blended delivery](#)

Plus 60 credits from electives courses

Second Pathway - 45-Credit Applied Research Project (ARP)

This pathway requires a shorter research report than the Thesis path and more course work.

[IT8501 - Research in Information Technology](#)

[IT8502 - Research Proposal](#)

[IT9501 - Applied Research Project \(45 credits\) - Online/Blended delivery](#)

Plus 105 credits from electives courses

Elective Courses

[IT8526 - Advanced Project Management for Information Technology](#)

[IT8510 - Business Analysis for Information Technology](#)

[IT8511 - Business Intelligence and Data Mining](#)

[IT8512 - Cloud Computing and ICT Infrastructure](#)

[IT8515 - Multimedia Application Development for Mobile Devices](#)

[IT8516 - Network Design and Management](#)

[IT8517 - Network Security and Forensics](#)

[IT8518 - Quality Assurance and Testing](#)

[IT8519 - Systems Architecture and Technology Integration](#)

[IT8520 - Special Topic Machine learning & Artificial Intelligence](#)

[IT8529 - Blockchain and Cryptocurrency](#)

[IT8521 - Research Project \(30 credits\)](#)

[IT8522 - Topics in Cyber Ethics](#)

[IT8524 - Internship \(30 credits\)](#)

[IT8527 - Cryptography & Security Mechanisms](#)
