

# Essentials and Support

“A lot of people around my age don’t think they can change careers, but it can be done. I haven’t looked back since.”

# Josh

IT Tech Support

Service Centre Digital Advocate

Josh has a wealth of experience under the belt in the trades and IT industry. His journey is an inspiring example of how change can really benefit people. Here, he talks about his career change and dives into his transition from the trades industry to study the Diploma in IT Tech Support.

## Building blocks

When Josh got his first computer at 11 years old, he was instantly hooked. He began learning HTML and webpage development. Countless hours were spent behind his computer screen, browsing the internet and learning the make-up of his computer. This was the start of a passion, which would later turn into his career.

After secondary school in 2004, he started an apprenticeship and enrolled in a pre trade course at WelTec.

Josh spent over 10 years in the trades industry, working on various building sites which took him around New Zealand, Australia and the UK. Although he was at the top of his game, he spent his leisure time on a computer.

## Taking the leap into IT

By 2019, Josh was well established in his career. He entertained the idea of starting a construction business, but he couldn’t ignore that he had lost his passion for trades.

Josh felt anxious leaving the trades world, but he knew changing careers was the right move for him.

“A lot of people around my age don’t think they can change careers, but it can be done. I haven’t looked back since”.

It was then that Josh made the decision to move back to New Zealand to study IT at WelTec. He was ready to take the leap.

Josh studied the Diploma in IT Tech Support, learning key skills around networking, database management, customer support and user management. For Josh, learning was seen through an industry perspective.

## From student to staff

After completing the Diploma in IT Tech Support in 2020, a role opened up with the ICT team at Whitireia and WelTec, as the Service Centre Digital Advocate. The transition into working at Whitireia and WelTec was natural for Josh.

“I found that there was a lot of transferable skills from trades. Being able work with different people, time-management, critical thinking and problem solving translated to my role in IT”.

Everyday is different for Josh. One day, he could be running an AV tutorial, another day he could be leading a workshop for students. For Josh, he enjoys the variation that this job brings. His decision to change careers has come full circle.
