Creative Technologies

Digital Storyteller and Studio Founder

Where did your passion for Creative Technologies start?

I became a cabinet maker after high school, and found I always leant toward the technical side of the job. There's heaps of hands-on work, but there's also a lot of technical drawing and 3D modelling.

Why did you decide to study Creative Technologies?

In my teens I loved art and drawing, but during my 20s I spent most of my time working and travelling. When I returned home from the UK after I turned 30, I decided I wanted to study something creative. I've always loved movies and CGI - I remember watching Avatar for the first time and thinking "Man I want to do this, this is cool." Being able to focus on animation at WelTec was a major draw too.

How was returning to study in your 30s?

Because I'd spent my 20s travelling and working, when I came back to study I wanted to absorb everything I could. I wanted to learn about this world I was getting into. At WelTec they were not only good at teaching me the fundamentals, but also answering all my questions and sending me off to learn more. I came out of the programme with such a wide range of skills - game development, animation, VR, web development, film, tv.

'Learning and practicing design thinking helped me learn how to tackle creative problems, and the amount of collaborative work we did taught me the power of working in a team. This work takes a lot of time, and you need people with you on the journey.'

How did your game development company, WildEye, come about?

I've always gotten a lot out of being self-employed, so after freelancing for a while, I decided to start WildEye. I had been a generalist for a while, but I always found myself sticking with game development.

What's one of your favourite projects?

A favourite project of mine is The Navigators, a 360-dome experience we made in a 3D creative tool called Unreal Engine, which was a challenge on its own. It's a story about how Europeans and Pacific Island Māori used the stars to navigate. It's a 3D animated short that's a permanent fixture in the Carter Observatory in Kelburn.

What would you say to someone wanting to study Creative Technologies?

Go for it! It's challenging - you've got to put in the work, but I think it's the best time to do it. When I left school, I thought it was impossible to get into this space, but the industry has never been more accessible.

Senior tutors at Whitireia and WelTec exhibit Te Ao Māori artworks at Te Auaha share traditional kōrero

Published on 25 November 2022

Senior creative tutors at Whitireia and WelTec, Gareth McGhie and Darren Ward, have collaborated to exhibit carved artworks at the exhibition space at Te Auaha on Dixon Street in Central Wellington.

The exhibition, Ngā waiata o a tātou taonga, has been three years in the making and was due to show earlier in the year but was postponed due to COVID settings.

Gareth's works examine Te pakanga o ngā manu (The battle of the birds), a Māori legend that described a mighty battle that once took place inside the forest when the sea birds came to steal the fish and eels from forest lakes. Hearing of the fierce invaders, all the land birds gather forces and challenge the invaders. Gareth's pieces are rendered in wheua (bone), rakau (wood), and niho paraoa (whale teeth) and utilize both traditional and contemporary forms and pattern work. Further information on Te pakanga o ngā manu is below.

Darren Ward's work focuses on taonga puoro (musical instruments) carved in both wheua (bone) and rakau (wood) with references to Tane Mahuta (God of the forest).

Gareth has taught across the suite of Creative Technologies programmes at Whitireia and WelTec since 2010. His art practice centres on contemporary Māori carving and adornment. The Kaupapa of this work is settled firmly within the concepts of Te Ao Māori and Whakapapa in particular. His work is exhibited regularly both in NZ and internationally.

Darren's research expertise is in Māori art and design and 3D methodologies and processes. He utilizes his knowledge of engineering to apply hard materials and processes along with emerging technologies into his teaching and creative practice.

Ngā waiata o a tātou taonga runs to 28 November 2022 at Te Auaha Gallery, 65 Dixon Street, Wellington.

“This exhibition is an opportunity to create works that support the continuation of significant Māori narratives in a contemporary sense,” says Gareth. “We invite our audiences to learn and reshare the stories we are describing through the artworks.”

New Zealand Certificate in Creativity (Level 4)

📖	Level 4
🕒	17 weeks, full-time
📅	07 Jul 2025 (Te Kahui Auaha)
💰	\$3,556 (indicative for 2025 intake)

Seeking all dreamers and creative thinkers! Learn real skills to bring your concepts to life. Come and learn about animation, game, graphic and screen design from tutors who work in these exciting design industries

What you will learn

This programme is designed for ākonga who are seeking to develop a range of foundational technical skills and conceptual knowledge to produce digital creative works. As graduates of this qualification, you will have developed a range of creative capabilities in preparation for further study.

More detail about this qualification

This programme covers courses in:

Graphic Design Studio

Ākonga will build their visual literacy and conceptual skills to provide a foundation for effective communications. You'll learn principles and elements of design, along with software and compositional skills.

Digital Media: Game Design

Ākonga will evolve their creative thinking and problem-solving skills within a collaborative context. Using storytelling skills and relevant techniques, you'll generate outputs for a chosen target audience.

Time-based Media 1: Animation

Ākonga will research and apply knowledge of diverse cultures and communities to expand their creative practice through the exploration and experimentation of physical and digital media. Recording, reflecting, and presenting ideas will form part of the process of evolving and resolving outputs.

Time-based Media 2: Screen Design

Ākonga will develop creative thinking and multi-media

techniques for screen-based outcomes. You'll learn camera handling skills and multi-media techniques including photography, image-making, and typography to produce a sequential narrative for the screen.

Course related costs

Some drawing resources may need to be purchased.

Entry requirements

Domestic

To be eligible for entry to this programme, applicants must:

Provide evidence of suitability based on a portfolio of work and;

- NCEA Level 2 (including 10 Literacy credits at Level 1 and 10 Numeracy credits at Level 1);
- or equivalent academic achievement;
- or on a case by case at the discretion of the Programme Manager.
